CARDIOVASCULAR HEALTH

Many people live with high blood pressure, cardiovascular disease, heart failure and risk for stroke and cardiac infarct.

Scientist detected a conjunction between the concentration of Omega 3 in the humanized web, blood, red blood cells and general in the cardiovascular system.

The Combination of natural ingredients like e.g. Omega 3 (cardiac function), Olive Polyphenols (blood lipids) and B-Vitamins (homocysteine level) may prevent atherosclerosis and lead to a healthy vascular function.

ARCOMPETENCE

CARDIOVASCULAR BASIC

Omega 3 // Vitamin E

CARDIOVASCULAR PLUS

Omega 3 // Q10 // B-Vitamins

CARDIOVASCULAR COMPLEX

Krill oil // Olive Polyphenols
Q10 // B-Vitamins

PRODUCTS

your perfect solution!

EFSA-Claims

- The amount of 250 mg EPA/DHA Omega 3 fatty acids contributes to the normal function of the heart.
- Olive Polyphenols contribute to the protection of blood lipids from oxidative stress.
- Vitamin E contributes to the protection of the cell constituents from oxidative damage.
- Vitamin B1 contributes to the normal function of the heart, energy metabolism and the nervous system.
- Vitamin B6 and Vitamin B12 contribute to the normal homocysteine metabolism and also for the normal generation of red blood cells.
- Folic acid contributes to the maintenance of the normal homocysteine level as well as a normal haematosis.

BLADDER HEALTH

Frequent urge to urinate, disturbed urination and bladder pain restrict quality of life and vitality. Many women suffer every year from bladder infection. Some of them for the first time and many others suffer periodical from this painful disease. Many women trust in Cranberries as protection of this painful bladder infection. The deep red Cranberries contain a lot of Vitamin C, as well as mineral nutrients and phytochemicals, the Proanthocyaniden (PAC).

Men who suffer from prostate problems should ingest special nutrients (e.g. Saw palmetto extract, Pumpkinseed oil, Urticae extract etc.), which have a fortifying and strengthen influence on the weaken urinary organ.

ARCOMPETENCE

PROSTATA BASIC

Pumpkinseed oil
Saw palmetto extract

PROSTATA PLUS

Pumpkinseed oil
Saw palmetto extract
Urticae extract

CYST

Cranberry // Vitamin C
Zinc // Selenium

SUPREME
PRODUCTS

your perfect solution!

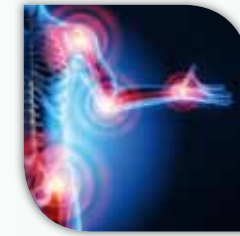

EFSA-Claims

- Vitamin C, Selenium and Zinc contribute to the normal function of the immune system.
- Zinc has a role in DNA synthesis and the process of cell division.
- Vitamin C, Selenium and Zinc contribute to the protection of cell constituents from oxidative stress.
- Vitamin B2 is added to sustain the maintenance of healthy mucous membranes for instance in the bladder.

CystiCran PAC Standardized Cranberry extract

- A-link PACs are the only PACs that provide bacterial anti-adhesion activity.
- Unique anti-adhesion activity to protect against urinary tract infection.
- Pilot clinical studies, ex vivo bacterial anti-adhesion activity of human urine.

MOVEMENT HEALTH

Osteoporosis in the middle age (from 50 years) can cause bone fractures. Most of these bone fractures occur at special areas (hip, wrist, backbone, etc.) restrict the quality of life. The first important step, recommended by medical scientists, is to adjust the lifestyle and to start with a basis therapy (intake of calcium and vitamin D). The next step is to take in Vitamin K2 to activate osteocalcin which improves the health of bones significantly.

Healthy bones and cartilages may, with the help of Chondroitin, Glucosamin, Omega 3 and micro elements, contribute to preservation of mobility and life quality at every age.

ARCOMPETENCE

OSTEOPOROSIS BASIC

Vitamin D3

BONE PLUS

Vitamin K2 // Calcium
Vitamin D3 // Omega 3

JOINT COMPLEX

Chondroitin // Glucosamin
Krill oil // Micronutrients
Vitamins

**SUPREME
PRODUCTS**

your perfect solution!

EFSA-Claims

- Vitamin K2 contributes to maintenance of normal bone and to normal blood coagulation.
- Calcium and Vitamin D contribute to the maintenance of normal bones and teeth.
- Vitamin D3 contributes to the maintenance of normal muscle function.
- Vitamin D3 contributes to normal absorption/utilization of calcium and phosphorus and maintenance of normal blood calcium concentrations.
- Vitamin B6 contributes to normal protein and glycogen metabolism.
- Vitamin C contributes to normal collagen formation and the normal function of bones, teeth, cartilage, gums, skin and blood vessels.
- Chromium and Zinc contribute to normal macronutrient metabolism.
- Copper and Manganese contribute to maintenance of normal connective tissues and to the protection of cell constituents from oxidative damage.
- Manganese contributes to the maintenance of normal bone and to normal energy-yielding metabolism.

MENTAL HEALTH

Maintaining cognitive performance has become an increasingly vital requirement of our active way of life. Our society, based on performance, is demanding and strives to stay in shape physically and intellectually.

Ginseng and Ginkgo biloba are recognized for its potency to immediately enhance working memory and attention.

Omega 3 provides among others the natural building block DHA, which may help to maintain healthy brain functions.

ARCOMPETENCE

MENTAL BASIC

Omega 3 // Vitamin E

MENTAL PLUS

Lecithin // Ginkgo biloba
B-Vitamins

MENTAL COMPLEX

Omega 3 // American Ginseng
Ginkgo biloba // Vitamin C
Iron // B-Vitamins

SUPREME
PRODUCTS

your perfect solution!

EFSA-Claims

- DHA contributes to the maintenance of normal brain function and to the maintenance of normal vision.
- Vitamin C contributes to the normal function of the nervous system and can contribute to the reduction of tiredness and fatigue.
- Iron contributes to normal cognitive function.
- Vitamin B5 contributes to normal mental performance.

SCIENTIFIC EVIDENCE

200 mg supplementation of Cereboost™ has been clinically proven to:

- Improve working memory*
- Support attention*
- Increasing cognitive performance*
- Healthy cognitive function*

Cereboost™ is a trademark of Naturex

VISION HEALTH

Our eye is an important organ which succumbs many strains like use of computers, television, short of sleep, alcohol and cigarettes.

To sustain the eye-sight in old age despite the high stress-level and to avoid age-related eye diseases like macular degeneration or glaucoma, micro nutrients are very important. Antioxidants contribute to the retention of the eye-sight as the micronutrients and the vitamins take care of it. The Omega 3 fatty acids, made of high-concentrated fish oil, contribute to the normal vision. In addition Lutein and Zeaxanthin have an important function in the retention of the health and function of the human macula, the central area of the retina.

ARCOMPETENCE

VISION BASIC

Omega 3 // Vitamin E

VISION PLUS

Euphrasia extract // Lutein
Omega 3 // Micro elements
Bilberry extract

VISION COMPLEX

Lutein // Zeaxanthin
Omega 3 // Vitamin C, B2, A, E
Micro elements

SUPREME
PRODUCTS

your perfect solution!

EFSA-Claims

- Vitamin A, Vitamin B2, Zinc and DHA contribute to the maintenance of normal vision.
- Vitamin E, B2, C, Copper, Selenium and Zinc contribute to the protection of the cell constituents from oxidative damage.
- Vitamin C can contribute to the reduction of tiredness and fatigue.
- Zinc contributes to normal metabolism of Vitamin A.

FloraGLO LUTEIN SCIENTIFIC FACTS

- more bioavailable than lutein from lutein rich foods
- patented oily lutein suspension
- most clinical researched lutein brand in the world
- source of lutein chosen by the investigators of the AREDS2 study
- improved visual and macular function in patients suffering from AMD

MOTHER AND CHILD

During Pregnancy and Lactation there is a high demand of many nutrients.

A healthy way of life and the correct combination of vitamins, minerals, micronutrients and essential fatty acids are very important for the child for the retention of the eye-sight and regular growth of the memory already during Pregnancy as well as Lactation.

If expectant mothers take care of a varied and balanced diet, an important contribution can be made for a good Pregnancy and a healthy growth of the child.

ARCOMPETENCE

PREGNANCY BASIC

Omega 3 // Folic Acid

your perfect solution!

EFSA-Claims

- DHA contributes to the maintenance of normal brain function and to the maintenance of normal vision.
- Vitamin A contributes to a normal function of the immune system and to normal iron metabolism.
- Vitamin A contributes to the maintenance of normal vision.
- Vitamin D contributes to the maintenance of normal bones and teeth.
- Vitamin D contributes to the normal function of the immune system and to the maintenance of normal muscle function.
- Folate contributes to normal cell division and to normal maternal tissue growth during pregnancy
- Iodine contributes to normal energy-metabolism.
- Iodine contributes to the normal production of thyroid hormones and normal thyroid function.
- Iron contributes to normal formation of red blood cells and hemoglobin to normal oxygen transport in the body.
- Zinc contributes to a normal function of the immune system and to the protection of cell constituents from oxidative damage.
- Magnesium contributes to normal energy-yielding metabolism, psychological functions and normal muscle function.
- Calcium is needed for the maintenance of normal bones and teeth.
- Vitamin C contributes to a normal function of the immune system.
- Vitamin B1, B2, B3 and Vitamin B5 contribute to the normal energy-yielding metabolism.
- Vitamin B6 contributes to normal protein and glycogen metabolism.
- Vitamin B12 contributes to normal neurological functions and for the normal generation of red blood cells.
- Biotin contributes to the maintenance of normal hair and normal skin.

ENERGY HEALTH

Active people have a high demand of energy. It is converted by the human cells from food into body's energy ATP. To cover the high energy demand, respectively to regenerate the cells faster, the application of Ubiquinol, L-Carnitin, Vitamin B12 and further B-Vitamins is reasonable. These lead to reduction of tiredness and exhaustion and contribute to energy metabolism.

Additionally Ubiquinol can support the cardiovascular system due to bioenergetical function. To increase the metabolism (fatburning) it might be useful to take CLA and L-Carnitin.

ARCOMPETENCE

ENERGY BASIC

CUSTOMIZED INDIVIDUAL CAPSULE

We have specialized in developing tailor-made product solutions for and with our customers. The own production is made in Germany with the best raw materials on the highest quality level and with certified processes.

We realize your individual capsule according to your needs and the requests of your target market.

The development process in all planning and production stages is accompanied by our know-how.
YOUR ENCAPSULATED CARE.

ARCO® accepts no responsibility for the compliance of the product ideas presented with the various local marketing regulations.

ARCO® does not make any guarantees in this respect.

CREATE YOUR INDIVIDUAL SOLUTION

CUSTOMIZED FINAL PACKAGING

Your individual product solution starts with the product, your developed and custom made softgel-capsule.

ARCOMPETENCE means more benefits and advantages for you. According to your requirement we produce your individual capsule packaging.

Blister, bottles, boxes incl. all required supplements or labels: Your product and packaging solution is satisfying for us when all your requirements have been fulfilled.

FINAL PACKAGING SOLUTION

- Bottles
- Blister
- Packed in a folding box

GRAPHIC SUPPORT

- Folding box

CREATE YOUR INDIVIDUAL SOLUTION

BENEFITS

Our long experience on the market can help you to realize your product.
It is one of our commitments to offer you the best possibilities for a successful project realization.

Complex information about the raw materials we use and our advice about existing and future market trends
will be at your disposal.

ARCOMPEXPERIENCE

QUALITY

- Production according to GMP & HACCP
- Production facility in Germany
- ARCO Quality assurance system

RAW MATERIAL INNOVATIONS

- Information of actual trends
- Market analyses

BRANDED INGREDIENTS

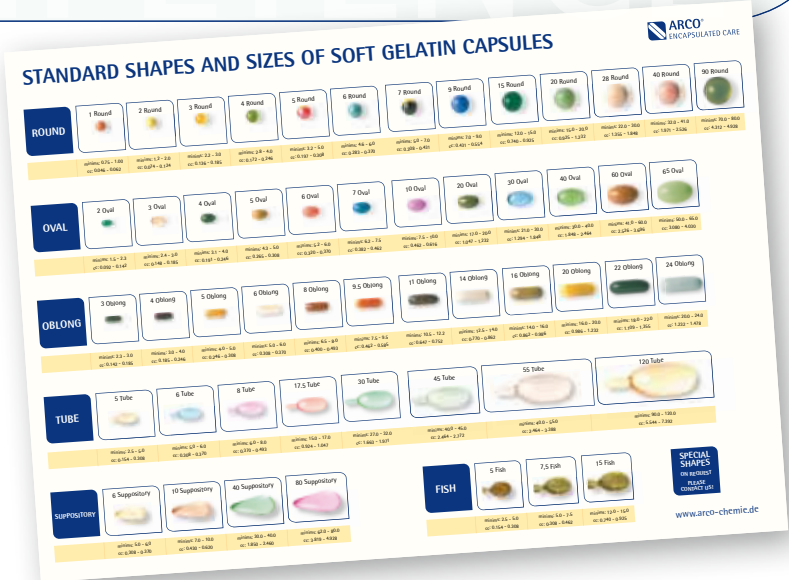

- High standards in production
- Comprehensive studies
- Literature & promotion information flyers

EFSA-CONFORM

- Selection of raw materials is based upon science-based studies
- Indication is possible

CUSTOMER SUPPORT

- Advisory service to find the right formulation which is suitable to your product portfolio
- Documents for registration
- Ready for sale product
- Everything from one source

COMPANY

We are a family-owned company and feel responsible for our customers, suppliers, employees and our society as a matter of course. As experts for soft-gel capsules we make complex compositions possible at a modern, high quality production level.

Our aim is with our activities, products and services to support and care for people's health.

ARCOMPETENCE

The main values of our company – our principles

Quality	The realization of our quality and product policy is one important task of the leading manager's. "Our General Manager's task".
Flexibility	To fully meet our customer's requirements, individual and short-term, is part of our expectations as a modern company in a fast shifting society.
Loyalty	We are convinced that the best results can be reached through loyal and long-term partnerships.
Responsibility	We feel responsible for our customers and employees. Respect, expactatious and mutual assistance are an important part of our company's philosophy.
Public Health	The responsibility towards our society is not only based in our core business but we feel obliged to support ideas contributing to the general health.
