Natural Cognitive Solutions

Maintaining cognitive performance has become an increasingly vital requirement of our active way of life. Our society, based on performance, is demanding and strives to stay in shape physically and intellectually. Superior cognitive function is therefore greatly desired. As consequence, increasingly more people are searching for natural solutions to experience the cerebral boost that is required by their everyday lives.

American ginseng has been used to improve cognitive function by Traditional Chinese Medicine. Ginseng and Ginkgo biloba are recognized for its potency to immediately enhance working memory and attention.

Omega 3 is widely known to have a positive impact on health. It provides among others the natural building block DHA, which may help to maintain healthy brain functions.

Cereboost™ is obtained from high quality American ginseng carefully selected by Naturex. Cereboost™ has a specific and unique profile in ginsenosides which guarantees its high activity.

Cereboost™ is a trademark of Naturex
ARCO® accepts no responsibility for the compliance of the product ideas presented with the various local marketing regulations.
ARCO® does not make any guarantees in this respect.

The extraction process and the high quality of American ginseng roots selected have been combined to obtain Cereboost™. Moreover, Cereboost™ owns a specific and standardized profile in ginsenosides guaranteeing its activity.

Premium characteristics

- North American origin
- Standardized profile in ginsenosides
- Patent granted
